UI-to-Backend API Mapping

18 Screens x 100+ APIs — Complete Connection Guide

Generated: 2026-03-21 | Alphenta Technologies

SCREEN 1: DASHBOARD

UI Element	Backend API	Data
Today's Sales KPI	GET /api/pos/today-summary	total_sale
Footfall KPI	GET /api/pos/today-summary	total_bills
Outstanding (Udhaar)	GET /api/dealers (sum outstanding)	total_outstanding
Stock Alerts KPI	GET /api/inventory/low-stock	count
UPI Collection	GET /api/pos/today-summary	upi amount
Cash Collection	GET /api/pos/today-summary	cash amount
Card Collection	GET /api/pos/today-summary	card amount
Expiry Alert	GET /api/inventory/expiry-alerts?days=2	count
Today's Activity Table	GET /api/pos/bills + GET /api/orders	recent bills/orders
Critical Stock Panel	GET /api/inventory/low-stock	products below reorder
Payment Flags Panel	GET /api/dealers (filter overdue)	dealers with outstanding
AI Banner	GET /api/alerts/dashboard	urgent actions

SCREEN 2: POS BILLING

UI Element	Backend API	Data
Barcode Scan Input	GET /api/barcode/scan/{barcode}	product info
Product Search	GET /api/products/?search=xxx	matching products
Cart (qty, price, GST)	Frontend calculation	local state
CGST/SGST Split	GET /api/gst/calculate	tax breakdown
Checkout 'Bill Karo'	POST /api/pos/bill	invoice_number, grand_total
Payment Mode	Part of bill POST body	payment_mode field
Recent Bills Table	GET /api/pos/bills?limit=4	last 4 bills
Scheme Auto-Apply	GET /api/schemes/check/{product_id}	best discount

SCREEN 3: PURCHASE ORDERS

UI Element	Backend API	Data
PO List Table	GET /api/purchase	all POs
Status Filter	GET /api/purchase?status=xxx	filtered POs
New PO Button	POST /api/purchase	new PO created
PO Detail Click	GET /api/purchase/{po_id}	PO + items

UI Element	Backend API	Data
Receive Button	POST /api/purchase/{po_id}/receive	items received
Supplier Cards	GET /api/dealers?dealer_type=supplier	supplier list

SCREEN 4: DEALERS & UDHAAR

UI Element	Backend API	Data
All Dealers Table	GET /api/dealers	dealer list
Dealer Detail Click	GET /api/dealers/{dealer_id}	full detail
Add New Dealer	POST /api/dealers	new dealer
Collect Payment Button	POST /api/dealers/collect-payment	payment recorded
Overdue Flags	GET /api/dealers (filter outstanding>0)	flagged dealers
Outstanding KPI	GET /api/dealers (sum outstanding)	total udhaar

SCREEN 5: INVENTORY

UI Element	Backend API	Data
Product List + Stock Bars	GET /api/products/?limit=200	stock_qty, reorder_level
Low Stock Alert	GET /api/inventory/low-stock	critical products
Stock Movements Table	GET /api/inventory/movements	in/out records
Batch Info	GET /api/inventory/batches/{product_id}	batches with expiry
Stock In Button	POST /api/inventory/stock-in	add stock
Stock Out Button	POST /api/inventory/stock-out	remove stock
Inventory Summary	GET /api/inventory/summary	total value, categories

SCREEN 6: EXPIRY & WASTAGE

UI Element	Backend API	Data
Expiry Pipeline (4 cols)	GET /api/inventory/expiry-alerts?days=30	batches by days_left
Already Expired	GET /api/inventory/expiry-alerts	expired items
Write-off Button	POST /api/inventory/stock-out (wastage)	stock reduced
Damage Record	POST /api/damage	damage entry created
Damage Report	GET /api/damage/report	damage summary

SCREEN 7: ORDERS

UI Element	Backend API	Data
Sales Orders Table	GET /api/orders?order_type=sale	order list
Order Detail Click	GET /api/orders/{order_id}	order + items
Filter (Status)	GET /api/orders?payment_status=xxx	filtered
GST Bill Generator	POST /api/gst/calculate	CGST/SGST split
e-Invoice Generate	POST /api/gst/einvoice	IRN + QR
HSN Report Tab	GET /api/gst/hsn	HSN codes list

SCREEN 8: PAYMENTS LEDGER

UI Element	Backend API	Data
Payment Summary Cards	GET /api/payments/daily-report	total_in, total_out
Ledger Table	GET /api/payments/ledger	all entries
Add Entry Button	POST /api/payments/entry	new entry
Cash Flow Chart	GET /api/payments/cash-flow	in/out breakdown
GSTR-1 Tab	GET /api/gst/gstr1?month=X&year=Y	tax collected

SCREEN 9: AI DEMAND FORECAST

UI Element	Backend API	Data
Trending Products	GET /api/ai/forecast/trending	top sellers
Product Forecast	GET /api/ai/forecast/product/{id}	predicted qty/revenue
Slow Moving	GET /api/ai/forecast/slow-moving	dead stock
Reorder Suggestions	GET /api/ai/forecast/reorder	what to order

SCREEN 10: AI CHATBOT

UI Element	Backend API	Data
Chat Input	POST /api/ai/chatbot	question text
Response Display	Same API response	answer text

SCREEN 11: FRAUD DETECTION

UI Element	Backend API	Data
Unusual Bills	GET /api/ai/fraud/unusual-bills	z-score flagged
Unusual Discounts	GET /api/ai/fraud/unusual-discounts	discount anomalies
Void Patterns	GET /api/ai/fraud/void-patterns	suspicious voids

UI Element	Backend API	Data
Payment Anomaly	GET /api/ai/fraud/payment-anomaly	payment flags
Fraud Dashboard	GET /api/ai/fraud/dashboard	overall summary

SCREEN 12: INVOICE AUTO

UI Element	Backend API	Data
CSV Upload	POST /api/invoice-auto/upload-csv	imported items
Text Paste Parse	POST /api/invoice-auto/parse-text	matched products
Export Sales	GET /api/invoice-auto/export-sales	CSV download
Template	GET /api/invoice-auto/template	CSV template

SCREEN 13: BANK RECONCILIATION

UI Element	Backend API	Data
Upload Bank CSV	POST /api/bank/upload-csv	imported transactions
Transactions Table	GET /api/bank/transactions	unmatched txns
Auto-Match Button	POST /api/bank/auto-match	matched count
Manual Match	POST /api/bank/manual-match	match confirmed
Recon Summary	GET /api/bank/recon-summary	match %, difference

SCREEN 14: DATA HUB

UI Element	Backend API	Data
Sales Report	GET /api/data-hub/sales-report	period-wise sales
Purchase Report	GET /api/data-hub/purchase-report	period-wise purchase
P&L; Summary	GET /api/data-hub/pl-summary	revenue, expenses, profit
Tax Summary	GET /api/data-hub/tax-summary	GST collected vs ITC
Category Report	GET /api/data-hub/category-report	category-wise sales
Dashboard Overview	GET /api/data-hub/dashboard	all KPIs combined

SCREEN 15: BARCODE

UI Element	Backend API	Data
Generate Single	POST /api/barcode/generate/{product_id}	EAN-13 barcode
Scan Barcode	GET /api/barcode/scan/{barcode}	product found
Bulk Generate	POST /api/barcode/generate-bulk	all products
Missing Barcodes	GET /api/barcode/missing	products without barcode

SCREEN 16: INDIA LAW / COMPLIANCE

UI Element	Backend API	Data
GST Config	GET + PUT /api/gst/config	GSTIN, state
HSN Codes Table	GET /api/gst/hsn	HSN list
Add HSN	POST /api/gst/hsn	new HSN
GSTR-1 Report	GET /api/gst/gstr1	sales tax
GSTR-2 Report	GET /api/gst/gstr2	purchase ITC
Compliance Check	GET /api/gst/compliance	checklist status
e-Invoice	POST /api/gst/einvoice	IRN generated

SCREEN 17: STAFF & PAYROLL

UI Element	Backend API	Data
Staff List Table	GET /api/staff	all staff
Add Staff	POST /api/staff	new staff
Edit Staff	PUT /api/staff/{id}	updated
Mark Attendance	POST /api/staff/attendance	daily attendance
Daily Attendance View	GET /api/staff/attendance/daily?date=X	all staff status
Monthly Summary	GET /api/staff/attendance/{id}/monthly	present/absent count

UI Element	Backend API	Data
Generate Payroll	POST /api/staff/payroll/generate	auto salary calc
Pay Salary	PUT /api/staff/payroll/{id}/pay	marked paid
Monthly Payroll Summary	GET /api/staff/payroll/summary/monthly	total salary

SCREEN 18: SCHEMES & OFFERS

UI Element	Backend API	Data
Create Scheme	POST /api/schemes	new scheme
Active Schemes List	GET /api/schemes?is_active=true	running schemes
Scheme Detail	GET /api/schemes/{id}	full detail
Edit Scheme	PUT /api/schemes/{id}	updated
Delete Scheme	DELETE /api/schemes/{id}	removed
Check Product Scheme	GET /api/schemes/check/{product_id}	applicable scheme
Scheme Report	GET /api/schemes/report/summary	performance

MISSING: APIs Exist but No UI Screen

Module	APIs	UI Screen?
Returns (Sales/Purchase)	7 APIs	NO screen
GRN (Goods Received)	4 APIs	NO screen
Stock Transfer	4 APIs	NO screen
Alerts Dashboard	4 APIs	Used in Dashboard only
